

TRAXTER[®] +

FORKLIFT TRUCK TIRES

Natural Rubber Compound
for cut resistance & cooler running

Premium Tread & Construction
for high performance

Low Rolling Resistance
for reduced fuel consumption

Large Contact Patch
for excellent traction

Square Shoulders
for stable ride

Extra Deep Lug
for long life

Rim Guard
for tire & rim protection

 **HELMAR**
PERFORMANCE TECHNOLOGY PARTS

PNEUMATIC - TUBE

- Cut & Chip resistant natural rubber based compound.
- High Traction Pattern.
- Reinforced Sidewall for puncture protection.
- Rim Guard for wheel protection.
- Consolidated shipments are possible.

Item#	Ply Rating	Size	Rim	Tread Depth (mm)	Unload Inflated Dimensions (mm)		Max Load Capacity		Max Inflation (kPa)

-	14	8.25-15	6.50-15	19.0	842	252	4225	9290	800

PNEUMATIC - SOLID

- Heavy duty construction for optimum performance, safety & comfort.
- Thick abrasion resistant tread for low rolling resistance.
- Highly elastic centre for excellent ride.
- Tough Base to eliminate slipping & spinning.
- Reinforced steel bead construction.
- Available in clip/quick fit.
- Available in two Non-marking options i.e. grey & off white.

These tires are suitable for heavy duty applications where forklifts are continuously operating for 15-18 hrs daily, and are comparable to the performance of Solideal Magnum.

All tires conform to ETRTO and T&RA standards

CUSHION

- Excellent rubber to metal adhesion for low rolling resistance & long service life.
- Advanced Natural Rubber compound for low heat build up.
- Suitable for intensive indoor applications.
- Option to order Steer Tire sizes in a special 2 layer HD compound for the most demanding applications.
- Available in smooth & traction tread.
- Available in two Non-marking options i.e. grey & off white.

INDUSTRIAL TIRE WARRANTY POLICY

Helmar Inc warrants, subject to the terms, conditions and limitations stated herein, its tires to be free from defects in materials and workmanship.

Any tire that becomes unserviceable due to defects in materials or workmanship shall be replaced by another comparable new tire on a pro-rata basis based on tread wear.

This warranty applies only to the original purchaser for 24 months from the date of shipment.

EXCLUSIONS TO THIS POLICY

This warranty does not cover:

1. Abuse, misapplication, irregular wear due to impact loads, improper mounting or incorrect rim that does not comply with International specifications or fitted or used in contravention of any State or Territory laws or regulations or in contravention of the recommendations of the vehicle manufacturer or used on wheels or rims that are out of alignment, under sized, oversized to the products, overloading or over-speeding beyond limits specified to ETRTO or US Tire & Rim Association, altered (including the marking), reprocessed or repaired in any way (including re-grooved or retreaded), bought second hand or blemished, fitted or used in breach of conditions of use or technical specifications as published from time to time.
2. Incidental or consequential damages, including but not limited to loss of time, loss of productions, vehicle or rim damage, cost of towing or transportation and any other consequential damages of any nature.
3. Cosmetic blemishes or marks on the tires.
4. Black Solid Resilient tires or Press On Band tires beyond 1000 hours of service.
5. Non Marking Solid Resilient tires or Press On Band Tires beyond 500 hours of service.

Helmar Inc makes no expressed or implied claims on expected tire wear. Variables that affect tire wear are driving conditions, load, speed and adherence to safety and good practices.

No dealer, agent or representative has the authority to make any promise or assurance on behalf of Helmar Inc except as stated in this warranty policy.

Claims must be filed within 30 days of discovery of defect and must include the following information:

- Description of the vehicle or machine manufacturer, type, year and when made
- Date of fitment & date of claim
- Description of tire use, kilometers or hours covered, pressure, way of use, location of the tire on the vehicle etc.
- Serial Number, brief description of defect & residual tread depth
- Photo of the defect & Serial Number

We reserve the right to inspect all products before making adjustments.

CERTIFICATE OF ANALYSIS		
Item	Type	Test Results
Tensile Strength	Mpa > 18	21.9
Breaking elongation %	% > 350	500
Shore Hardness (shore A)	Degree 65±5	68
Wear Loss (Akron)	CM3 < 0.4	0.18
These products listed in this brochure are tested by GB/T10824-1996, the appearance, and the qualities are conforming to the requirements.
